

Mechanical Ventilation Workshop

Tuesday 22nd October 2019

The mechanical ventilation workshop is designed for clinicians working in critical care areas who wish to enhance their knowledge of Mechanical Ventilation.

Topics include Invasive Ventilation, Non-Invasive Ventilation and High Flow Nasal Cannula. Different ventilation strategies will also be discussed.

Breakout sessions will provide participants with the opportunity to practice setting up the following equipment:

- **Hamilton T1 ventilator**
- **Airvo 2**
- **Oxylog 3000**
- **Neopuff**
- **RespironiCS V60**

Scenario based activities will also provide participants with the opportunity to trouble-shoot common ventilator problems.
