

Workshop Overview: This workshop is designed to provide participants with knowledge of the basics of simulation, provide an orientation to simulation labs, teamwork and develop, conduct and evaluate simulation scenarios.

The workshop will develop the knowledge and skills required to conduct learner centred debriefing sessions. The benefits of learner centred debriefing are explored along with the various debriefing theories and techniques. Participants will also be given the opportunity to apply the various techniques by conducting supervised debriefs of actual scenarios.

Target Audience: Nurses, Medical Officers and Allied Health staff who are interested in pursuing a career in Education

Tuesday 4th June 20189
