About the workshop

This inter-professional workshop aims to update podiatrists, doctors, nurses, pharmacists, diabetes educators and other health professionals on diagnosis and management of the diabetic foot. Latest research, clinical guidelines and practice-based examples will be included, including a panel Q&A session.

Topics covered

- ✓ Why people with diabetes experience foot infections
- ✓ Assessment and classification of diabetic foot infections (DFIs)
- ✓ Biofilms as a cause of chronic and persistent wound infections
- ✓ IWGDF (International Working Group on the Diabetic Foot) and IDSA (Infectious Diseases Society of America) guidelines for classifying infection severity
- ✓ Surgical management of DFIs
- ✓ Antimicrobial stewardship and resources for local clinicians
- ✓ Therapeutic treatment and antimicrobial prescribing for DFIs
- ✓ Pathophysiology, early identification and non-pharmacological management of Charcot Foot
- ✓ Leading Better Value Care (LBVC) initiative
- ✓ Multidisciplinary high risk foot services update
- ✓ Integration of private and public community podiatry services with the multidisciplinary high risk services
