

The Late Effects of Polio **FREE** Clinical Practice Workshop Lismore

• Earn 2 CPD hours • Certificate of Attendance • Free e-book "Managing Muscles and Mobility"

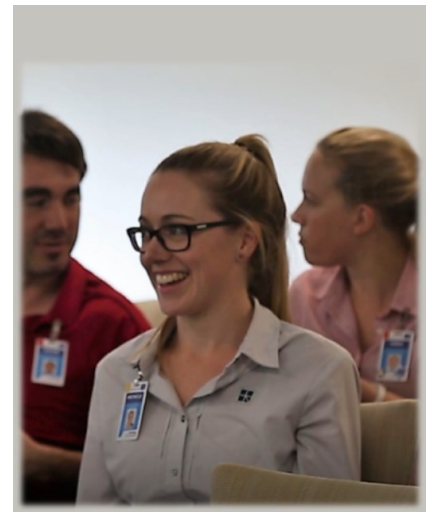

There are an estimated 400,000 post-polio clients needing appropriate health care. Health professionals (HPs) will learn a holistic approach to the Late Effects of Polio (LEoP).

Participants will receive evidence-based assessment and symptom management skills assist polio survivors enjoying an improved quality of life.

Polio survivors are turning their attention and hopes to HPs to help them improve their quality of life, and prolong their daily functional ability as they age.

Become a recognised post-polio service and enhance your skills in treating neurological conditions.

The workshop provides education on:

- Demystifying the LEoP
- Clinical presentation and assessment
- The ageing polio population
- Specific HP Roles
- Practical strategies
- Q&A with a polio survivor
