

Lead teams with confidence: Clinical Skills & Telehealth Trainer Program for Aged Care Nurses

From simulation to practice:
Strengthening decision-making
and virtual care across your teams

About the Program

This practical workshop equips educators and clinical leaders to teach and embed Telehealth, structured communication, and clinical decision-making tools across their teams. Learn how to build confidence in training delivery, workplace coaching, and supporting staff to respond early to resident deterioration. Leave with ready-to-use resources to implement training in your aged care home.
